According to the scope of the system - (Online Course Registration System)

STUDENT DASHBOARD

1. POST STUDENT REGISTRATION
(Basic info: firstname, lastname, email, password)

2. POST STUDENT LOGIN
(email, password)

3. GET COURSES LIST
(List of courses each with: course name, description, and prerequisites)

4. POST COURSE REGISTRATION
(to post selected courses)

5. NOTE: There should be an "is_paid" key value which is false by default so once student pick courses to register and submit it, it will be saved, but the "course registration" process will be incomplete... we will dynamically display "Complete your course registration" so they can pay. After payment and is_paid is now true, the course reg is complete.

6. GET REGISTERED COURSES LIST FOR STUDENT
(To display on their dashboard after successful reg and payment)

ADMIN DASHBOARD
